Cognitive Symptom Management

When you are feeling down in the dumps, feeling pain or having other unpleasant symptoms, how often do you *(Please circle one number for each question)*:

1. Try to feel distant from the discomfort and pretend that it is not part of your body ........ 0 1 2 3 4 5
2. Don't think of it as discomfort but as some other sensation, like a warm, numb feeling ........ 0 1 2 3 4 5
3. Play mental games or sing songs to keep your mind off the discomfort ......................... 0 1 2 3 4 5
4. Practice progressive muscle relaxation .............. 0 1 2 3 4 5
5. Practice visualization or guided imagery, such as picturing yourself somewhere else........ 0 1 2 3 4 5
6. Talk to yourself in positive ways ........................ 0 1 2 3 4 5

**Scoring**

Score the number circled for each item. If more than one consecutive number is circled, score as the lower number (less management). If the numbers are not consecutive, do not score the item. The scale score is the mean of the six items. If more than two items are missing answers, set the value of the score for this scale to missing. Scores range from 0 to 5, with a higher score indicating more practice of these techniques.

**Characteristics**

Tested on 1,129 subjects with chronic disease. N=51 for test-retest.

Comments

This scale was modified from the Medical Outcomes Study. This is a behavior change scale to find out if people are practicing any cognitive stress reduction (pain reduction) techniques. We chose to measure these specific techniques as they are the ones we teach in our Chronic Disease Self-Management Program. Reprinted with permission, Duke University Press.
